# Be Bright! Turn to Soalar Power

Solar power is renewable clean power that is available every day of the year, even cloudy days produce some energy. It has virtually no maintenance as solar panels last over 30 years. We can generate a lot more energy than we consume and this we can trade with utility.

The Green City Committee has taken an initiative to help members for Installation of Solar Power System, to derive, clean pure energy from the sun.

ME TO WE

# AN APPEAL

To have a healthy ecosystem we are dependent on various natural resources, and one of the things we can do is to protect Mother Earth by planting trees. They give us oxygen, hold the soil and give life to the wildlife.

An appeal from the Green City Committee is to request each member to contribute in twos or multiples of twos ( 500/- for each tree) for plantation at various places in our city, to increase our tree cover. As we are laying stress on protecting the trees, than just planting, for which we need tree gaurds too. Kindly do contribute on birthdays, Anniversaries or when you are happy.
