## ROTARY'S END POLIO NOW INITIATIVE

Rotary members have been at the center of the worldwide effort to eradicate polio for more than three decades. Rotary launched PolioPlus in 1985 and helped found the GPEI in 1988, with the goal of eradicating a human disease for only the second time in history. (The World Health Organization declared the world free of smallpox in 1980.) When the GPEI was founded, wild poliovirus paralyzed hundreds of children every day, with an estimated 350,000 polio cases across more than 125 countries in one year. Since then, cases have plummeted more than 99.9%, sparing more than 20 million people from paralysis.

Through a funding partnership with the Bill & Melinda Gates Foundation, Rotary commits US\$150 million to fighting polio every year. Rotary members have contributed more than US\$2.6 billion and countless volunteer hours to this effort. With the GPEI partners, members engage with communities everywhere to encourage high vaccination rates and help immunize more than 400 million children annually.

As World Polio Day on 24 October approaches, Rotary urges its members to tell their communities about the importance of vaccination. Global donors and national governments are also expected to announce new pledges to fund the GPEI's 2022-26 polio eradication strategy. This strategy focuses on greater accountability from national governments about their work to eradicate wild polio and end outbreaks of polio caused by variant poliovirus.
