We aim to work on the lines of Rotary's Areas of Focus with dedication and sincerity. Our main motive was to serve in a better way in the best possible manner.

With Best Wishes to all of you.

July 2022

Every month since I joined Rotary, I've looked forward to reading this magazine, especially the opening essay from our Rotary president. I'll admit that as much as I appreciate a digital copy, I still revel in the tactile sensation of sitting down and leafing through the glossy pages. They are a treasure trove of photos and memorable stories about our great organization — the one we all know and love. I have learned so much over the years about service projects and lives that each of you have transformed.

As a communications professional, I have longed for the day that our stories were a regular part of mainstream media and that our flagship magazine might populate doctor's offices, coffee shops, or anywhere else people sit, wait, and browse. It's great that Rotary members are better informed about all we do, and wouldn't it be that much better if more people knew our stories.

All this was top of mind as I thought about our plans for promoting Rotary worldwide in the upcoming year. Over the next 12 months, we are going to shine a light on projects that put Rotary service on display to the world, and we are going to do it strategically.

Nick and I will focus on some of the highest impact, sustainable, and scalable Rotary projects from our areas of focus in what we call the Imagine Impact Tour.

We are inviting top-tier journalists, thought leaders, and influencers to use their channels to help us raise awareness by reaching people who want to serve but have not yet realized they can do it through Rotary. But there was another important issue to consider — our carbon footprint. I take seriously Rotary's emerging leadership position on environmental issues. The example set by our members during the pandemic is fundamental to how we carve out our future.

That means we will harness digital technology to tell these stories — we will be tweeting, posting, and "going live" to anyone who will listen. We must consider our environment, and part of that means not always traveling but continuing to connect in meaningful ways as we have for the past two years.

Of course, we are social people, and we still need to be together. We simply need to be more mindful of our decisions and think about how we get together just a little bit differently. For example, if we travel to visit a project, we will plan successive visits in neighbouring areas.

So, what are your stories and who can help tell them? I hope you might consider your own Imagine Impact efforts — your story might be something you can promote just as easily on social media or during a Zoom call. Think about ways to showcase notable projects in your clubs and districts.

We all feel the impact that Rotary service and values have on us. Now it's our opportunity to share that feeling with others.

us all. We are proud that we worked under you and got motivated and inspired from you and that we started Cancer Detection-on-Wheels Service Project during your tenure and shall work in future involving your good self to work for the betterment. The year has ended but the show must go on..... !

Plus, during your leadership, we have donated 2 dialysis machines and have PSA Oxygen Gas Plants and launched Free Ambulance Service and Free Tractor Service being our two new permanent projects we added.

The baton will be transferred to my prodigy Rtn Hitesh Patel soon, name will change but the work will never have a full stop, we will work with same spirit and same energy and will bring much more service project works as possible.

We shall also increase as much new members in the younger generation so that they will bring innovative ideas and new project works. On the other hand, we would also try to concentrate on some permanent projects so that we are able to do something good with Rotary Recognition amongst the local public.
