## PRESIDENT'S DIARY

### **My Visit to Samaj Suraksha Sankul.**

Samaj Suraksha Sankul is a residential and support institute for children who are visually impaired, physically challenged and who need protection and care. Sankul rehabilitates children with special needs and empowers them to live a life of dignity and independence and become productive members of the society.

The Principal explained how the children are learning to use new tools to manage their daily routine. It is indeed a pleasure to see visually impaired children using computers with all the latest apps and travelling freely. Mobility training is an important prerequisite for the integration of visually impaired persons. It enables them to become more independent indoors as well as outdoors.

Under Inclusive education, four visually challenged children are enrolled at regular schools with the help of school trustees. Every individual child is unique so the IEP (Individualized Education Plan) of the child is prepared. Regular follow up with children, parents, School teachers, exposure visit and support at all levels is constantly provided and regular coaching is provided in regular school hours and the extra aid required is provided and supported by Deepak Foundation.

We need more of such institutions. It was indeed a worthy visit and good to see the wonderful care taken and work done by Deepak Foundation.

## EDITORS DESK

### **Dear Rotarians,**

Of course, we've all looked our best this festive season; partied with our friends, exchanged pleasantries, infused positivity and joy in the lives of our near and dear ones, basked and soaked in, in all these elements at their best.

After having reveled in the joie de vivre of Diwali celebrations, isn't it time to rejuvenate our minds and bodies from the festival fatigue? ... Isn't it time to sit back and reflect?... Take time to meet ourselves too? ... before getting back to our routine grind.

It's the small little things of our routine, like listening to music with our morning cuppa, or sweating it out in a gym, or the yoga exercises, or reading newspapers at leisure and such things that we yearn for, to get on with normal life from post festival blues.

As we head towards the onset of refreshing winter, let's make time to put up our feet, enjoy the warmth of the sun, and just be ... for a change.

## RI Bytes

Rotarians are doers. Show them a problem and they look for solutions. But a global problem such as climate change might seem daunting to even the most resourceful Rotary member.

Break that complex problem down into smaller pieces, however, and you find there are many things Rotarians can do — and are already doing, with help from The Rotary Foundation.

A coalition of researchers and scientists led by environmentalist and writer Paul Hawken mathematically modeled the climatic and economic impact of potential solutions to learn which ones would yield the best results for people and the planet. The list, compiled in a 2017 book called "Drawdown: The Most Comprehensive Plan Ever Proposed to Reverse Global Warming," included some surprising possibilities, such as educating girls, promoting family planning, and assisting farmers. As it happens, all of those align with Rotary's areas of focus.

**Girls' education** - A woman with no schooling has four or five more children, than a woman with 12 years of schooling, which means that educating girls will have a huge impact on population growth.

**Regenerative agriculture** - Regenerative agriculture practices include avoiding the use of plows to keep from disturbing the soil; planting a diverse array of cover crops; and limiting or abstaining from pesticides and synthetic fertilizers. These methods boost the amount of organic matter — carbon — in the soil, improving its health and that of the plants growing in it.

**Reduced food waste** - One-third of the fruits and vegetables, meat, and other food the world produces never gets eaten. Instead, it rots unharvested in fields, spoils in storage, or sits forgotten in the back of the refrigerator, only to end up in the garbage.

**Rooftop solar** - The sun is an underused energy source: The Drawdown authors note that less than 2 percent of the world's electricity is generated through solar photovoltaic panels. However, the panels have been more widely adopted over the past decade as the technology has grown more affordable.

**Tropical forests** - Tropical forests once covered 12 percent of the world's land; today, it's a mere 5 percent. According to the Drawdown authors, that loss accounts for up to 19 percent of the greenhouse gas emissions caused by humans.

## District Beat

Rotary District 3060 felicitated 2 cycling rotaractors Rtr Dhanush & Rtr Hemanth from Rotary Club of Bangalore Whitefield Dist - 3190 & Rotaract club of Shishu Mandir. They are attempting for the Guinness book of world record by cycling 25,000+ kms In 200 days and covering 29 states and 3 union territories. This will be the Longest journey by bicycle in a single country. They have undertaken this journey to spread awareness of environment protection and adult literacy.

## Member's Achievements - Rtn. Preeti Shrial

'Humbled to be conferred with the Shikshak Samman 2021 by PSACWA ( Private Schools and Children Welfare Association).

This one is dedicated to my amazing , awesome , par excellence, outstanding and superlative team

A tribute to all the inspirational educators for keeping the flame of learning shining bright ....converting challenges into opportunities with stoic grit, resolute determination , perseverance, resilience and unwavering passion '

**Dr.Priti Shreemal rightly received this award for her perseverance.**

## ANNET'S ACHIEVEMENTS - Annet Rutvij Pritesh Shah

I am Rutvij Pritesh Shah. I am an electronics enthusiast, professional cricket player and currently working towards making products to combat air pollution. My aim is to be a leading innovator, trendsetter and entrepreneur, work to improve society, to bring a better tomorrow.

My keen interest in the electronics field led me to be an active member of the International Institute of Electrical and Electronics Engineers (IEEE) and develop electronic projects and mentor students. This stint with IEEE, motivated me to advance into the field of R&D and develop something of my own. During my graduation, I interned with an award winning IOT device start-up as a marketing ambassador and secured the first rank in my category. After my graduation I interned with a US based company that develops first of its kind digital braille reader and writers for blind people which are used by them to operate laptops and

smartphones. This journey taught me a very important lesson: to strive to develop products which will first and foremost improve the quality of life of humans. Thus, I set out to develop an affordable and portable Indoor Air Quality Monitors & Purifiers which can help us detect and improve the quality of air that we breathe in.

The first part of this journey has begun, as PRIMA has already launched first generation of Indoor Air Quality Monitors named "MiKro Gas Monitor". My goal with this initiative is to make reliable long life air monitors & purifiers, which are affordable to everyone. My journey has just begun. ....
