MESSAGE FROM THE PRESIDENT

Warm Greetings to each one of you!

At the district level, we celebrate a historic milestone as we welcome our first lady Governor, whose leadership is as visionary as it is compassionate. Her chosen theme, "Create Your Own Legacy," beautifully compliments our international goal. It challenges us to not just serve- but to serve in a way that leaves behind a lasting legacy of hope, progress and empowerment. A shining example of this vision is the District Governor's dream project for the upliftment of girls -OPPOL. This transformative initiative focuses on seven impactful verticals which have girls' names - Abhaya, Vidya, Asha, Nirmala, Shreya, Janani and Bhumika. The meaning of these names itself focuses on the area of con-

Our club is proud to align with this powerful vision. With unity in purpose and strength in service, we are committed to actively contributing to OPPOL and other meaningful initiatives. Let's take this opportunity to not only serve the society but also build our own legacy – a legacy of compassion, action and unity. Together let's Unite for Good and Create our Own Legacy, one act of service at a time

POLIO & ROTARY

HISTORY OF POLIO

"In the early 20th century, polio was one of the most feared diseases in industrialized countries, paralysing hundreds of thousands of children every year. Soon after the introduction of effective vaccines in the 1950s and 1960s however, polio was brought under control and practically eliminated as a public health problem in these countries.""It took somewhat longer for polio to be recognized as a major problem in developing countries. Lameness surveys during the 1970s revealed that the disease was also prevalent in developing countries. As a result, during the 1970s routine immunization was introduced worldwide as part of national immunization programmes, helping to control the disease in many developing countries.

Rotary International launched a global effort to immunize the world's children against polio in 1985 followed by the establishment of the Global Polio Eradication Initiative (GPEI) in 1988. When the GPEI started, polio paralysed more than 1000 children worldwide every day. Since then, more than 2.5 billion children have been immunized against polio thanks to the cooperation of more than 200 countries and 20 million volunteers.

Today, wild poliovirus continues to circulate in only two countries, and global incidence of polio cases has decreased by 99%. There has also been success in eradicating certain strains of the virus; of the three types of wild polioviruses (WPVs), the last case of type 2 was reported in 1999 and its eradication was declared in September 2015; the most recent case of type 3 dates to November 2012 and this strain was declared as globally eradicated in October 2019.
