Healthy Ahmednagar Initiative (Mosquito Nets Distribution, Part I)

The Healthy Ahmednagar Initiative (Mosquito Nets Distribution, Part I) was a focused public health campaign conducted in collaboration with the Municipal Corporation. Under this initiative, 1000 mosquito nets and drain caps were distributed to 1000 families throughout the community. This strategic distribution is designed to help prevent the breeding of mosquitoes and reduce the spread of mosquito-borne diseases.

The nets and drain caps serve a dual purpose: they act as a physical barrier to protect families from mosquito bites and help control mosquito populations by preventing stagnant water from becoming breeding grounds. By implementing these preventive measures, the initiative aims to significantly lower the risk of diseases such as dengue and malaria, thereby contributing to the overall health and well-being of the community.

This event highlights the strong commitment of Rotary Club of Ahmednagar Midtown to community health and preventive care. Through active collaboration with the Municipal Corporation, the project not only provided essential health resources but also raised public awareness about the importance of environmental management and personal protection in disease prevention.

Project Benefited to : 1000+

No. Of Rotarians Involved : 5

Glimpses of

Healthy Ahmednagar Initiative (Mosquito Nets Distribution, Part I)

Online Employment Exchange Program with Government Officials

The Online Employment Exchange Program was a forward-thinking initiative that brought together government officials and industry leaders to boost employment opportunities. With the active participation of 45 employers from MIDC, Ahilyanagar, the program aimed to create a robust platform for job seekers to connect with potential employers.

The event was designed as a hybrid model, beginning with an online phase that facilitated discussions and interactions between employers and job seekers. This digital engagement allowed for the efficient matching of vacancies with skilled candidates. Following the online sessions, offline trainings and interviews were organized to further equip participants with the necessary skills and enable face-to-face engagement with prospective employers.

Overall, this comprehensive Employment Exchange Program not only provided immediate job leads but also enhanced the employability of participants through targeted training. By bridging the gap between employers and job seekers, the initiative played a crucial role in fostering economic empowerment and creating sustainable employment opportunities within the community.

Project Benefited to : 200
