2023 - A Year of CHANGE

Unleash your full potential as a PHOTOGRAPHER - Part III

A few tips for mobile phone landscape photography

1. SHOOT FIRST, ZOOM IN POST

The problem with fixed camera lenses is that zooming in is exactly the same as cropping the image. This means that the further you zoom in, the less detailed the image is going to become. It's the same as 'digital zoom'. So, do **NOT** use your camera zoom feature. The best possible outcome will happen if **you move closer, or "zoom with your feet"**. If that is not possible, **crop it in post-production**.

2. GET LOW, TURN YOUR PHONE UPSIDE DOWN

Include low level foreground element in your landscape photography. Flipping your phone upside-down is an ultimate game changer.

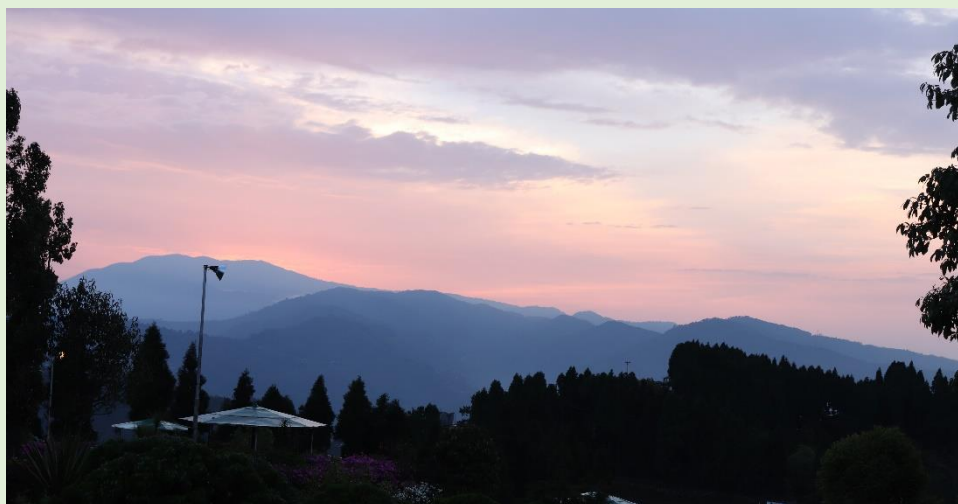

3. STRAIGHTEN THE HORIZON

Ensure your photo is straight by lining up your landscape using the grid-line feature on your phone. The camera grid is a feature that divides the frame of your photos using four lines that run horizontally and vertically across the screen.

4. SHOOT AT GOLDEN HOUR

Good lighting makes all the difference, and landscape photography is no different. Venture outside with your camera phone around thirty minutes before and after sunrise or sunset.

Project

Notebook distribution to students of Mahishbathan Jatiya Pathshala - 10th Feb 2024

RCSLDT club members distributed notebooks and pens to the students of Mahishbathan Jatiya Pathshala on 10th February 2024. It was a great interaction with students and teachers of that school. The President and members, along with family members, were present on the occasion. Mr Sanjay Saha, a prospective member, also whole-heartedly participated in the project. Principal of the school thanked our club for the wonderful project.
