THALASSEMIA
It is a genetic disorder. It occurs when one inherits mutated genes from their parents that change hemoglobin.

Be aware, test before you pair.
Stop thalassemia before it starts.

This year, while continuing our legacy projects, we have also undertaken several meaningful initiatives with compassion and commitment:

- Distributed 5 Cycle Vans to underprivileged families, creating livelihood opportunities and empowering lives with dignity.

ROTARY CLUB OF SONARPUR

Glimpse of few of our Service Projects

Under the initiative of Rotary Club of Sonarpur and Rotary District 3291, five underprivileged individuals were provided with cycle vans on 12.07.2025 at the premises of Ashram Anandam School.

Our Cervical Cancer Awareness Program held on Saturday, 19th July 25 at 11:30 AM, at Binodini Girls School. The insightful session by Dr. Shyamapada Pati, Prof. of Gynecology at KPC Medical College, was truly appreciated by all.

September being observed as Literacy Month, a documentary film on Rabindranath Tagore was exhibited, followed by an interactive Question & Answer session, donated old books on Computer Basics and Programming to the Library of Ballygunge Vidyalaya. Like every year, awarded scholarships to 10 deserving students to support and encourage in their educational journey.

September being observed as Literacy Month, we organized a Literacy Project for the children and their mothers at RCC Ashram Anandam. It was heartening to witness the enthusiastic participation of around 50 children and 25 mothers in this meaningful initiative.

Micro Credit Financial assistance was extended to several local residents, which they will utilize for their livelihood and repay after one year. Over the past 10 years, nearly 100 individuals have been empowered through this initiative.
