### World Heart Day 2023:

Theme

The theme for this year's World Heart Day is "Use Heart, Know Heart" (USE ♥ KNOW ♥).

WORLD Heart Day: History and Significance: In the year 2000, World Heart Day was established in partnership with the World Health Organization (WHO). The reason was to create a day that would raise awareness and mobilize international action against cardiovascular disease. In 2011, World Heart Day became an annual event.

Cardiovascular diseases (CVDs) are the leading cause of death globally. An estimated 17.9 million people died from CVDs in 2019, representing 32% of all global deaths. Of these deaths, 85% were due to heart attack and stroke. Over three-quarters of CVD deaths take place in low- and middle-income countries. Out of the 17 million premature deaths (under the age of 70) due to noncommunicable diseases in 2019, 38% were caused by CVDs. Most cardiovascular diseases can be prevented by addressing behavioural risk factors such as tobacco use, unhealthy diet and obesity, physical inactivity and harmful use of alcohol. It is important to detect cardiovascular disease as early as possible so that management with counselling and medicines can be given.
