International Day for the Elimination of Violence against Women - 25th November

"Sexual violence against women and girls is rooted in centuries of male domination. Let us not forget that the gender inequalities that fuel rape culture are essentially a question of power imbalances." - UN Secretary-General António Guterres. Violence against women and girls (VAWG) is one of the most widespread, persistent and devastating human rights violations in our world today remains largely unreported due to the impunity, silence, stigma and shame surrounding it.

The Declaration on the Elimination of Violence Against Women issued by the UN General Assembly in 1993, defines violence against women as "any act of gender-based violence that results in, or is likely to result in, physical, sexual or psychological harm or suffering to women, including threats of such acts, coercion or arbitrary deprivation of liberty, whether occurring in public or in private life."

Violence against women continues to be an obstacle to achieving equality, development, peace as well as to the fulfillment of women and girls' human rights. Goals (SDGs) - to leave no one behind - cannot be fulfilled without putting an end to violence against women & girls. 1 in 3 women and girls experience physical or sexual violence in their lifetime, most frequently by an intimate partner. Only 52% of women married or in a union freely make their own decisions about sexual relations, contraceptive use and health care. Worldwide, almost 750 million women and girls alive today were married before their 18th birthday; while 200 million women and girls have undergone female genital mutilation (FGM) 1 in 2 women killed worldwide were killed by their partners or family in 2017; while only 1 out of 20 men were killed under similar circumstances 71% of all human trafficking victims worldwide are women and girls, and 3 out of 4 of these women and girls are sexually exploited.
