ROTARY INFORMATION

HEALTH, HUNGER AND HUMANITY GRANTS(3-H Program)

In 1978, Rotary launched its most comprehensive humanitarian service activity with the Health, Hunger and Humanity Program. The 3-H Program is designed to undertake large-scale service projects beyond the capacity of individual Rotary clubs or groups of clubs.

By 1994, more than 135 different 3-H projects have been approved and undertaken in 49 different countries, with an appropriation at more than \$37 million. The objective of these projects is to improve health, alleviate hunger and enhance human, cultural and social development among peoples of the world. The ultimate goal is to advance international understanding, goodwill and peace.

The first 3-H project was the immunization of 6 million children in the Philippines against polio. As 3-H progressed, new programs were added to help people in developing areas of the world. Now, in addition to the mass polio immunization of over 100 million children in various countries, 3-H has promoted nutrition programs, vocational education, and improved irrigation to increase food production, polio victim rehabilitation and other activities which benefit large numbers of people in developing countries. All 3-H projects are supported by the voluntary contributions of Rotarians through The Rotary Foundation. In years to come the 3-H Program may well be considered Rotary's finest service activity, showing how Rotarians care and are concerned about people in need, wherever they may be.
