ROTARY QUOTE:

Do you always believe the grass is greener on the other side of the fence? Remember, it's only grass! With water, seed, fertilizer and time, the greenest grass may grow right where you are! –Robyn T. Brale

EDITORIAL

WHEN GOING GETS TOUGH THE TOUGH GETS GOING.

In Covid times with Virtual meetings everywhere Rotary club Virajpet went ahead to conduct the non virtual-Real time meeting following all protective norms.

The save environment #Rotary Virajpet#SaveEnvironment campaign continued with a detailed description of vermi composting given by Rtn Saroj Cariappa. Annets Pranav and Annet Saanvi along with their cousin Mansi took to paddy fields while Annet Shakya highlighted the importance of conserving water

Ann did have a good time preparing Madd soppu delicacies and read ahead for a brief write up by Ann Raksha regarding the same.

Rotary school Virajpet excelled in academia by scoring 100% results in SSLC examination. Indeed a splendid effort by management, teachers, students and their parents.

India's 74th Independence day celebrated with zeal across the country. President Rtn Bansi Poovanna hoisted the national flag at Rotary school Virajpet with the Management and teachers of the school.

- Ann Dr Priyadarshini

Weekly meeting was held on 13.08.2020

With all precautions and social distancing the weekly meeting was held at Rotary school, Hall Virajpet

ROTARY NEWS

PRID Sushil Gupta has been conferred the Rotary Award of Honor by Rotary International by the RI Board of Directors headed by President Mark Maloney

From R: President PRID Mark Maloney
PRID Sushil Gupta and PRID Rajendra Saboo

#ROTARYVIRAJPET #SAVE ENVIRONMENT

HOW TO PREPARE WORMICOMPOST/VERMICOMPOST

Install vermi bed/bin of desired size. It is readily available in market.

At the bottom of the bin spread cocopeat all over. Neem leaves can be spread as well. Spread on that a thin layer of soil mixed with neem cake. Next layer spread chopped paddy straw for the aeration to earthworms. Sprinkle water on this to maintain moisture, create good atmosphere for the earthworms. Next adding cow dung, a very important food for the worms and ensure it is old. Fresh dung causes harm to the worms. If the cow dung is too old and dry sprinkle water on it to maintain moisture

Add Setter Erythrina(Halwana or Palwana) leaves on it if it is available. Again spread a layer of cowdung and repeat the process until the bin gets filled up. Leave the earth worms in it. The compost bin should have a covering above it to avoid direct sun or shower.

More the worms you leave in the bed sooner the compost. For about 45 days wormicompost will be ready for use. If the quantity of worms is less then the process takes 60 to 80 days. Wormicompost is the best organic manure. Benefit of using vermicompost is hundred fold. Stay safe and healthy

-Rotarian Saroj Cariappa

Annet Shakyas Talks of saving water

The Gen next Annets Pranav , Sanvi and their cousin Mansi - Younger generation getting their feet soiled and setting a good example

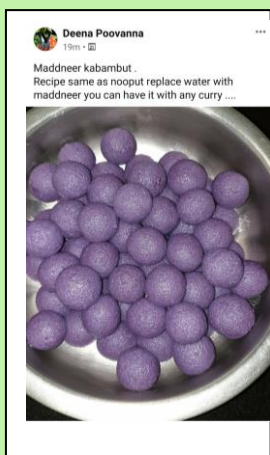

Maddu soppu/ Justica Waynaadensis

Justica Waynaadensis is an endemic medicinal plant found in regions of Western Ghats from S.Canara, Coorg to Waynaad, East Nilgiris and south Malabar hills in south India. It's prevalent in areas where there is no observance of direct sunlight.

A typical juice is produced in all parts of the plant which includes the leaves stem and twigs. There is a historical saying that the juice extract is produced inside the plant only in the month of Kakkada/Aati(July 17th to august 16th). During Pushya rain it is believed that this plant produces 18 types of medicinal properties. Each property is added one by one into the plant juice right from first to eighteenth day of Kakkada masa. The people of Kodagu consume the juice extract in varied forms. This has been practised from ancestral time. The place wher the plant grows is surrounded by a particular fragrance. It is said that if the juice is consumed at this time it generates heat and stabilizes body temperature thus helping people overcome the cold of Pushya rains. It is given to children for deworming, good for urinary tract infection, purifies blood with many other added medicinal values. After Aatimasa the extract of the plant will turn from dark purple-pink to pale red colour and the fragrance disappears.

It is believed to be a great boon to people of Kodagu as it has so many Medicinal values

CONGRATULATIONS

Congratulations to Rotary school Virajpet, Chairman, Management teachers and students for achieving the wonderful feat of 100% results in SSLC examination

Jennifer E. Jones, a member of the Rotary Club of Windsor-Roseland, Ontario, Canada, has been nominated to become Rotary International president for 2022-2023, a groundbreaking selection that will make her the first woman to hold that office in the organizations 115 year year history.

"Silver linings rise out of the most challenging circumstances. Using metric-driven goals, I will harness this historic landscape to innovate, educate, and communicate opportunities that reflect today"- Jennifer E. Jones
