Gordon R. McNally
R.I. President 2023 - 2024

Rtn. AKS. Ravi Raman
District Governor 2023 - 2024

Rtn. Jyoti Vakharia
President

Rtn. Vijayaraghavan
Secretary

PROUD INDIA !!!!!

Indians aspirations is high - to be best in the world at whatever we do. With this aspiration two events has happened on 23rd August 2023

Chandrayan 3, landed Successfully on the south Pole region of moon at 6.04pm. Another one is Praggandha, 18 yrs old prodigy, India's Chess Grand master tried to beat Magnus Carlsen at FIDE World Cup 2023. Both were extremely difficult tasks to achieve. Entire nation, 1.4 billion people got rooted for them.

What & why was it so difficult for Chandrayan 3 to achieve? Well, first of all it never has been attempted before. In the past people have achieved landing their modules on the moon's lunar surface which was the equatorial region. Chandrayan 3 landed on moon near it's southern Polar region which is not at all easy with so many adversities. The entire nation watched it with bated breath as though they themselves are going to land there.

In Baku, Azerbaijan, an eighteen years old Indian, faced the present greatest Chess player on the planet Magnus Carlsen to compete at FIDA World Cup 2023. It wasn't easy for Praggandha.

Though Magnus Carlsen has never won the World Cup before but he definitely was hungry for title, but Pragg was in scintillating form. He had already knocked out World Champion no. 3 Hikaru Nakamura and no. 2 Fabiano Caruana. If Pragg would have beaten Magnus Carlsen on 23rd Aug, he would have created history as the youngest player ever in the world to win FIDE World Cup.

Landing on moon's South Pole and beating Magnus Carlsen were both toughest tasks. But Chandrayan 3 & Praggandha made us believe that "it is important to attempt the difficult". There are goals in the world that no-one believed, someone could achieve. With hard work and quiet dedication, you let your 'moves' do the talking, and who knows if you achieve it. It will expand the collec-

tive consciousness of the world of what is possible and what is not. Though Pragg drew 2 matches and lost one, but seating across Magnus Carlsen by itself is an achievement.

Please Note. Isn't it amazing coincidence that the Rover of Chandrayan 3 is named as PRAGGYAN!!!!. I don't know whether it's a coincidence or not. Coincidence, is it not?

In the light of these 2 big events, another small (according to me, it's a big) event, we shouldn't miss Tejas fighter Jet, has successfully cleared it's test flights. Tejas Jets are designed by Aeronautical Development Agency in collaboration with Aircraft Research & Design Centre of Hindustan Aeronautics Ltd. for Indian Air Force and Indian Navy. So now India is prepared for War too.

Another mentionable event, World Champion of Men' s Javelin throw - Neeraj Chopra finishes Second in Zurich Diamond league. He is Padma Shree Awardee, Major Dhyanchand Khel Ratna Awardee and more.

Isn't it Proud Moments for India and Indians.

I am Proud Indian, Are you???
