Very Good Evening Rotarians,

Dr. A.P.J. Abdul Kalam once said that he was still learning. Having completed his stint at ISRO and the Presidency of Indian Nation, he continued to learn and impart learning to the pupils through out the length and breadth of nation. He breathed last while in a discourse on the topic “Creating a Liveable Planet Earth” with the learners at IIM Shilong. A modern day ideal teacher through out his life lived like a saint, created miracles in Science, in public and private life maintained highest ideals of a great teacher.

Teachers are the backbone of any society. They play a vital role in shaping the minds of present generation for future needs. They implant their knowledge and experience in the minds of pupils, they foster critical thinking, creativity and problem solving skills essential to compete in this fast developing arena of Knowledge and creation. The tools such as knowledge transmission, skill development, mentorship, assessment & feedback, adaptability, technology integration and the like are employed to shape the developing minds.

A good and active teacher empowers pupils, shapes their thinking process to achieve success in future world of work and productivity and builds strong, supportive communities, fostering positive relationships among students, colleagues, and parents. Their contribution to society, thus, attracts applaud and appreciation in every form and manner. We, thus, celebrate Teachers Day to pay our respectful gratitude to whole lot of great persons in this field.
