## Editorial

Very Good Evening Rotarians,

Ever wonder why 1st July is the beginning of the Rotary year? Rotary's first fiscal year began the day after the first convention ended, on 18th August 1910 and it was followed in 1911 also. The next August, The Board of Directors ordered the audit of International Association of Rotary Club's finances. The auditors recommended that the organisation end its fiscal year on 30th June to prepare a financial statement for the convention and board. The Executive Committee agreed and, in April 1913, designated 30th June as end of the fiscal year. Since then it is followed globally.

The beginning month of the Rotary year follows the theme, maternal and child health as well as transition month. This month of July started journey, propelled by the fresh infusion of officials, their installation and celebration of Doctor's Day, befitting the theme of the month.

Every day mothers risk their lives giving birth and millions of children die each year from treatable, preventable causes. At least seven million children under age of five die each year due to malnutrition, poor healthcare, and inadequate sanitation. To help reduce this rate we continue to provide protein rich food kits, counselling, education, immunisations and antibiotics to babies, improve access to essential medical services and support trained healthcare providers for mothers and children. Women are counselled, how to prevent mother-to-infant transmission of diseases, how to breast feed and how to protect themselves and their children from diseases.
