Very Good Evening Rotarians,

The smallest act of kindness can change a life for ever and health of child is wealth of nation. They are fondation of a strong nation.

A baby's health is influenced by many factors, such as genetics, mental health and environmental conditions. The congenital conditions, inherited or acquired, such as heart defects or thalassemia can aggravate the baby's health condition. There are potential causes for contacting infections during pregnancy or after birth itself which can be managed by proper course of treatment, medications, and attention, supported by adequate nutrition, breast feeding and supports to healthy growth and development.

The monitoring of baby's health requires parental care before and after birth, screening of new born baby by pediatric professionals addressing the immediate concerns and proper vaccination.

The role of Rotary community in causing maternal awarenes to physical, medical and nutritional requirements through local seminars and professional clinics is undeniable; and exactly this is the area where Rotary steps in with professional and monetary resources to aid, boost and address short comings in these fields.
