Editorial

Very Good Evening Rotarians,

In Rotary we are committed to support activities that strengthen conservation and protection of natural resources and to help enhance ecological sustainability. We empower and encourage local communities to embrace local solutions with innovative service projects, by accessing grants and other resources to foster harmony between people and nature.

The Rotary Foundation enables our members and their community partners to take action by : enhancing the capacity of communities to support natural resource management and conservation; addressing the cause of climate change by reducing emission of greenhouse gases; strengthening ecosystems and communities affected by climate change; supporting education initiatives that promote behaviour that protects the environment; enhancing the capacity of communities to support natural resource management and conservation and so on.

Our club has initiated the process of green plantation of hundred fruit plants, medicinal plants, timber plants, and those types of plants who enhance soil health, absorb carbon dioxide and release oxygen. This action plan is to be executed in Nabanir Briddhashram, Kanchan Nagar and Idilpur Dam site. Though it is a small step but it is for good of community at large and conservation of the environment.
