Very Good Evening Rotarians,

The last week had been a busy week for the club members with programmes related to awareness about mental health, blood donation, and whole day comprehensive programme of patient treatment at the dialysis centre at Jhurjhure Pool.

The Blood Donation is a selfless act that saves a life in surgeries, trauma, and blood disorders. Those who donate blood make a difference in the life of receiver. On the other hand regular blood donation by a capable person also acts as rejuvenation by the after effect of blood donation. It also helps to improve cardiovascular health of the donor.

Alongside the physical health, the mental health of persons especially in the vulnerable groups such as the adolescents, the aged and old, is the community concerns and an area of focus for development of community health. This field is time and area intensive where target oriented programme is prepared and followed in a systematic manner for a long time with the help of professional persons. Where a member of community is identified as a target patient in need of medication and further counselling, that person is required to be segregated and put on right course to help him return to normal orientation. Our club is regularly engaging in such types of programmes throughout the year relentlessly.
