## Editorial

Good Evening Rotarians,

The menace of cervical cancer has been discussed many a times in appropriate forums and has been a burning topic in media as well. The human papillomavirus has been diagnosed to cause change structural change at cellular level structural change.

The Indian chapter of the prevention of cervical cancer in the potential age group has embarked upon the route to provide and secure vaccination. The renowned Social worker and member of Rajya Sabha, Smt. Sudha Murthy, raised this issue in Rajya Sabha on July 2nd, 2024, wherein she pleaded for a Government sponsored vaccination drive among the girls of age group 9-14 years as it is an effective form of prevention. The price of the vaccination, has been suggested to be subsidised one through government funding.

The Interim Budget in February 2024 Government announced it's commitment for HPV Vaccination Programme for girls aged 9-14. In January 2025 Government rolled out a national immunisation program. The Ministry of Health is conducting training and capacity building program for frontline health workers. A tender to this effect has been floated. The single dose regimen, as suggested by WHO is under serious consideration for inclusion in national program. A Plan for using newly developed U-WIN platform, similar to Co-WIN platform is proposed to be used to manage this huge HPV vaccination drive. Once the efforts and finances are aligned and executed it will be second to none but to the drive of Covid-19 vaccination.
