

*Today's programme
Nation builder Award & celebration of club's birthday.*

EDITORIAL

Nation builders are the individuals who take initiative to develop the community. People need few things like knowledge of a common language, shared identity, a sense of duty, and loyalty to the system for the progress of a nation. These are the basic things which everybody learns from an early age. Teachers teach these disciplines from primary classes which encourage children to lead the social harmony and economic growth of the society. Teachers are the best trainers and by the power of education they form a harmless and developed community for the nation.

The responsibility of a nation builder is to demonstrate an eagerness and willingness to help others. He/she should have the interest to learn about the nation, culture, and language, and have a desire to share with others. The best teacher takes the responsibility to educate the students to think about these questions; Where I come from, Where am I going, Why am I here, and Who am I?

The organisations and society should acknowledge and recognise the dedication and service of the Nation Builders.
