EDITORIAL

There was a huge change in the history of transportation on December 7th, 1903. Besides road, the marine transport commuters found a new way, 'air travel'. This only happened by the dedication of two brothers Wilbur and Orville Wright. The invention of the airplane created a great history in Aviation sector.

The Wright brothers after extensive research and several failures were able to fly an aircraft for less than two minutes. These few seconds of success made history in aviation for making airplanes. At first it was introduced to the American Army. Gradually, it spread to passenger planes. These genius brothers' character, determination, perseverance, and the efforts to overcome the obstacles guided them to achieve the goal. World has the best and smoothest way to travel to different countries.

The Wright brothers' achievement inspires individuals to pursue passion, take risks and believe in self in spite of the scepticism, setbacks and failed experiments.

Everyone should follow their qualities of team work, patience and co-operation rather than criticising each other.
