EDITORIAL

Motivation creates optimism, hope, and confidence to achieve the goal. The members of an organisation if motivated to work towards a specific goal, the performance will excel and there will be success. They should be brave, enthusiastic, imaginative to face challenges like failures, discouragement, and disappointment to succeed. All these qualities will balance the organisation and will help it to achieve the target.

Nature has given us all the pieces required to achieve exceptional wellness and health. It's our duty to put all these pieces together for a better life. A small appreciation and a wonderful gesture is important to bring out the best in a person.

Everyone deserves and wants to be appreciated. Awards are the best solutions. Generally we come across two types of awards, one is recognition award to honour an achievement and other is appreciation award to reflect gratitude. Last week, District 3262 celebrated its award ceremony to encourage and express gratitude to Rotarians.

Rotary took charge and tried to create something to eradicate polio from the world. By hard work, motivation and unified efforts

it achieved the goal, only few countries are left. People still link the logo of Rotary as the polio logo. It shows the motivation resulting from hard work received appreciation and recognition from everyone.
