## End Plastic – Save Earth

Rotary Club of Guwahati Luit proudly launched an innovative environmental initiative titled “End Plastic – Save Earth.” The project aims to reduce plastic pollution and create greater awareness about the harmful impact of single-use plastic on our environment.

As part of this initiative, cloth bags were distributed among the public with an appeal to replace plastic bags in everyday use. An awareness program was also organized to educate people about the dangers of single-use plastic items such as bottles, cups, and straws. Citizens were encouraged to adopt eco-friendly alternatives like steel, paper, and reusable products.

Club President emphasized the urgent need to eliminate plastic usage, highlighting how plastic waste severely damages the environment, pollutes land and water bodies, and poses a serious threat to human and animal life. The initiative received an encouraging response from the community, reinforcing the message that small individual actions can lead to significant environmental change.
