THE EVOLUTION OF ROTARY'S MARK OF EXCELLENCE

The Mark of Excellence - The Rotary Wheel

The Journey of The evolution of the Rotary's Mark of excellence shows how inclusive and democratic Rotary has always been through years, giving space to ideas of all Rotarians...

Here is the Story....

A Simple Wagon Wheel is what it started with

In 1905, Montague M. Bear, an engraver and member of the Rotary Club of Chicago, sketched a wagon wheel with 13 spokes as a club emblem. When fellow club members began to complain that the design was static and lifeless, Bear added flourishes that made the wheel appear to ride on a bed of clouds.

Changes suggested and incorporated

Unfortunately, some members felt the clouds looked like dust, defying the laws of physics by being kicked up on

both sides of the wheel. One observant Rotarian pointed out that a wheel would not generate clouds of dust in front of it, so Montague removed the offending cloud and that design remained

More changes incorporated

In 1910, the Rotary Club of Philadelphia added cogs to create a working wheel, symbolizing members working together, literally interlocked with one another to achieve the organization's objectives. They used 19 cogs in honor of their club, the 19th in Rotary.

Rotarians had more suggestions and it evolved more

In 1918, two Rotarian engineers from the Duluth Club Charles Henry Mackintosh and Oscar Bjorge (formally of Minnesota) petitioned Rotary to amend the design of the wheel. They argued that a cogwheel with 19 cogs would not work. Also, the emblem had square-cornered teeth of disproportionate size, and the cogs were irregularly spaced. Charles called it, "An anachronism to engineers." Oscar called it "an insult to engineering that only the brain of an artist could conceive." Oscar sketched a new wheel, with 6 spokes (symbolizing the 6 Objects of Rotary at that time) and 24 cogs or teeth. This design was presented to the Rotary world in 1920.

The Strength of Rotary - Common Identity being lost due to custom variations

When new clubs formed, they adopted the wheel in symbols of their own. Each club added some element in the Rotary Wheel to create a unique identity for themselves.

It wasn't until 1922 that the Rotary International Association declared that all Rotary clubs should adopt a single design as the exclusive emblem of Rotarians. But, before the approval of Charles and Oscar's gear wheel, the President of Rotary Club of Los Angeles, Will Forker submitted one change: "The 'hub' design of the new 'wheel' is that of an 'idler' wheel or gear, there being no provision for the reception or transmission of power to or from a shaft," he argued. But, he said, incorporating a keyway would make the new wheel "a real worker" Oscar and Charles heartily agreed. So, in 1923 the keyway was added and the design.

The Official Rotary Emblem

At the 1929 Rotary International Convention, it was determined that blue and gold would be the official colors of the organization, so the wheel was designed with these colors. The four blue bands within the outer radius of the gear represent our four avenues of service. And the design which we now know was formally adopted as the official Rotary International emblem.

The Rotary Wheel emblem is a registered trademark protected throughout the world by Rotary International. The Rotary Wheel not only distinguishes Rotary in the community, but also helps Rotarians identify each other, and has become one of the most familiar symbols in the world today.

What we see today...

In 2013 the wheel was updated to a more modern appearance and is the Rotary 'Mark of Excellence'. Additionally, the wheel and the word 'Rotary' were brought together to become the Rotary signature or Masterbrand.

As The Rotary's Mark of excellence and The Rotary Masterbrand Signature evolved through the years, so has Rotary and its members evolved but the core remains the same as it was 29 years back....The Mark of Excellence - The Rotary Wheel
