Rotary Club Dharwad was born in the year 1940. It is a matter of great pride for all of us that RC Dharwad is the oldest club of our District 3170. It started with Sri N.K. Dixit, an eminent Advocate from Dharwad was elected as founder President with 30 charter members.

Today, we have completed 85 years of Service to Mankind. It also means our club is served by 85 eminent Presidents in past 85 years. RC Dharwad has given birth to more than 10 new clubs over the period. Our club has produced 5 District Governors, Hosted 7 District Conferences. Members of our club are the footprints of a great legacy of Rotary Club of Dharwad.

Madhurvani has played a very important role in bringing the families of Rotarians closer. The tradition of Madhurvani has been more than 5 decades old. In my 45 long years in Rotary, I can safely say that the legacy that RC Dharwad has carried has been unprecedented.

It is upto our leaders of tomorrow to carry this legacy forward. I congratulate our outgoing President Rtn. Laxmikant Naik & Secretary Ashok Nagasamudra for a commendable Rotary Year 2024-25.

Although the installation is scheduled on 3rd July 2025, it is on the intervening midnight of 30th June & 1st July that the tenure of Presidentship & his new team begins. Installation is only a ceremonial function to display the good community work executed by our club.

I wish our President 2025-26 Rtn. P.K. Nandyalkar, who had a highly successful professional career with State Bank of India has set Big Dreams for Big Projects for our club in 2025-26 & ably supported by equally competent Secretary Rtn. Each one of us can observe our daily experiences and we see that the modern AI-enabled technologies have up in a big way. We can see the examples from defense, healthcare, education, entertainment and society, the new technology has found newer avenues of application. The World Economic Forum's (WEF) 2025 Future of Jobs Report says that by 2030, a total of 170 million new jobs would be created, while 92 million would be displaced.

In this context, the Indian and the global industry have already trained more than 3 lakh engineers in the domain. The Centre of Excellence for Artificial Intelligence, Data Science and 10k Internet of Things Startups facilities are established by the Government of Karnataka & NASSCOM to empower students. The Government of India has approved Rs 10,300 Crore for IndiaAI Mission, it will empower AI Startups and to create computing infrastructure.

The Government of India has recently launched a scheme for providing drones to the Women Self Help Groups (WSHG). The scheme aims to provide drones to 15,000 selected women SHGs to provide services to farmers for spraying fertilizers and pesticides to agriculture fields.

The AI technology can be seen to assist humans, rather than, replacing them in complex decision-making, in regulated industries, like pharma, food and healthcare. So, one need not worry about the job losses, but rather focus on adapting to the new technology. The younger generation needs to capitalize on the recent trends, and at the same time be aware of the downsides of the technology. The AI technology has penetrated various strata of society very rapidly and will continue to enhance the comforts required for human existence.
