President & Chairman's Note

The Green Side of Service:

Rtn. Anjana Basangoudar

President, The Rotary Club of Hubli Central

April, celebrated as **Rotary's Environment Month**, reminded us that service to humanity also means service to our planet. At the Rotary Club of Hubli Central, this month was a beautiful blend of compassion, awareness, sustainability and community action. Through impactful initiatives like the E-Waste Donation and E-Waste Collection drives, we encouraged responsible disposal and environmental consciousness while taking small but meaningful steps towards a greener tomorrow. **The Green Lens – Photography** initiative creatively inspired members to appreciate the beauty of nature and the importance of preserving it.

Alongside our environmental efforts, the spirit of Rotary service continued to shine through projects like **Clothes Distribution, Books Donation, Health Awareness Campaigns, Wellness Initiatives** and **Community Engagement** programs that touched countless lives. Each activity reflected our belief that true service creates impact not only for people, but also for the world they live in. This month reaffirmed that sustainability begins with awareness and grows through collective action. Every effort — no matter how small — contributes towards building healthier communities and a healthier planet. I extend my heartfelt gratitude to all Rotarians, Annets, volunteers and project coordinators for their dedication, enthusiasm and commitment throughout the month. Your passion for service continues to inspire meaningful change in our community. Together, let us continue to serve with purpose, protect with responsibility and lead with compassion.

Secretary Message

As we step into April, Rotary's focus on **Environment Month** reminds us that caring for our planet is no longer a choice—it is a shared responsibility. The environment around us reflects the habits we practice every day, and even the smallest mindful action can create a meaningful impact for future generations. At Rotary, service extends beyond communities; it also includes protecting the world we all call home. Whether it is **Conserving Water, Reducing Waste, Planting Trees, or Spreading Awareness**, every effort contributes towards building a cleaner, greener, and healthier tomorrow.

This month encourages us to reflect on the role we play in preserving nature and inspiring others through action. Together, through awareness and collective responsibility, we can create sustainable change that truly matters. I appreciate the efforts and participation of all our members who continue to support initiatives that make a positive difference in society and the environment alike. **Let us continue to serve with purpose and grow with responsibility.**

The Editor's Cut: April 2026

“Earth’s Quiet Reminder: Small Steps, Big Impact”

Nature speaks to us every day — through the air we breathe, the water we use, the trees that quietly stand beside us, and the little moments of peace we often overlook. Yet, in the rush of life, we sometimes forget that the planet we live on needs care just as much as we do. As we observe **Environment Month this April**, it serves as a gentle reminder that sustainability begins not with grand gestures, but with simple everyday choices. A little less waste, a little more kindness towards nature, a little more awareness — and collectively, these small actions create meaningful change.

This issue of **BUZZ TIMES** celebrates not just the beauty of our environment, but also the responsibility we share in protecting it. Through creativity, conversations, and community efforts, we hope to inspire mindful living and greener thinking. Our back cover this month reflects this thought in a light-hearted yet meaningful way — because sometimes even Earth wishes it could send us a message. As always, thank you to every member who contributes, participates, and supports the spirit of our bulletin. Your involvement is what keeps **BUZZ TIMES** buzzing with energy, ideas, and purpose. Let us continue to nurture not only our communities, but also the world around us — for ourselves and for generations to come.
