March is Water, Sanitation & Hygiene Month

MARCH

Clean water is a basic need for human beings. When people, especially children, have access to clean water, they live healthier and more productive lives. However, at least 3,000 children die each day from diseases caused by unsafe water, which is what motivates our members to build wells, install rainwater harvesting systems, and teach community members how to maintain new infrastructure.

While very few people die of thirst, millions die from preventable waterborne diseases, providing the impetus for our members to also improve sanitation facilities in undeveloped countries. Members start by providing toilets and latrines that flush into a sewer or safe enclosure and then add education programs to promote hand-washing and other good hygiene habits.

From the various water projects in which Rotary has participated, we have come to know the obstacles that many people across the globe face when it comes to some of the basic necessities of life. We tend to take for granted the clean and generally safe and plentiful water sources to which we have access.

Rotary International, through the combined actions of individual Rotarians and Rotary Clubs, seeks to assure that all people have adequate access to clean and safe water. The Rotary theme for March, Water and Sanitation, asks us to focus on the life changing improvements that we can make through these international projects to provide a more readily available and healthy supply of water to all people.

The problem is not that the world will run out of water (that amount is fixed through evaporation and re-condensation). The problem is the unequal distribution of water and the lack of universal proper sanitary practices to assure safe water for drinking. While some regions and peoples are certainly at greater risk than others and deserving of greater attention, we have seen recently that no population is free from concern. Consider the lead problems in Flint, Michigan and the approaching Day Zero for Cape Town, South Africa (which fortunately has been moved further out and may never happen). Water and sanitation issues will certainly continue to be an area of focus for RI and deserving of our attention as Rotarians.

RC Phoenix arranged an industrial visit to Kushi food factory, where food masala items were manufactured.

Utilizing these positive measures and manufactured with the latest technologies in grading, processing, and packing. since it was a family gathering. Anns, Annets, and Rotarians took part and gained comprehensive knowledge about food goods and market pollution.

Kushi Foods CEO Rtn. Thirunavukarasu gave a brief speech about his products and raised awareness of products on the polluted market.
