Zone-3

Chartered Date: 22-07-2022

December is Disease Prevention and Treatment month. Here's why!

The theme for Rotary's December month is Disease Prevention and Treatment.

This is one of the Rotary Foundations Areas of Focus and one in which many of us would be aware of the numerous projects around the world supported by clubs and the Foundation. Look at your role in promoting improved health at home and abroad and supporting these vital programs that contribute not only to healthy communities but peaceful communities.

Disease prevention and treatment takes on many forms, from supporting studies to helping immunize people to improving drinking water and the sanitation infrastructure. The world relies on Rotary to tackle these global challenges, and to set an example for others to follow.

Focus: Rotary's commitment to preventing and fighting disease is one of its six areas of focus.

Signature project: Rotary's signature project in this area is polio eradication.

Other efforts: Rotary members also work on other disease prevention and treatment efforts, such as:

- Setting up health camps and training facilities
- Designing and building infrastructure
- Supporting studies
- Helping immunize people
- Improving drinking water
- Improving sanitation infrastructure

Rotary's global network of Rotarians invest their time, money, and expertise into these priorities.

Phoenix Strategic Goals

Project Date: 16 November 2024

Project Venue: Pondicherry.

PROJECT - 20

Every year we Rotary Club of Salem Phoenix travel to Pondicherry to plan our upcoming year, and the trip is named as Phoenix Strategic Goals (PSG). The planning will be done for the current period's president team (January to June six months) and the incoming period's president team (July to December six months). On the first day of the two-day program, Phoenix engaged in team-building exercises, constructive debates, and conclusions.

We firmly think that this strengthens the ties between the two teams and the two Rotary periods, resulting in a seamless and dynamic collaboration for upcoming projects.

Joint meet & Flag Exchange

Project Date: 17 November 2024

Project Venue: Pondicherry.

RC Phoenix organised a joint meeting and flag exchange with RC Pondy White Town. Both clubs attended, shared ideas, and gave each member a better introduction to their business. The meeting was then adjourned for breakfast.

We RC Phoenix gave a momentum to the fellow club president in appreciation of their arrangements and assistance.

Joint meet & Flag Exchange

Project Date: 17 November 2024

Project Venue: Pondicherry.

PROJECT - 22

We met together with RC Pondy Beach town at their location for our very next session. carried out the same plan. Flag exchange happened by blasting crackers. later called off the meeting for lunch.

Assistant Governors of all three clubs also participated in this meet.

We RC Phoenix gave a momentum to the fellow club president in appreciation of their arrangements and assistance.

First Aid for your Water Damaged Phone

Turn off the phone immediately

- Power off the device as soon as possible to avoid short circuits. If it's already off, don't try to turn it on again until it's completely dry.

Remove any accessories

- Take out the SIM card, memory card, and any external cases or covers. This will allow water to escape and prevent further damage to the internal components.

Dry the exterior

- Gently wipe down the phone using a dry, soft cloth or paper towel. Avoid shaking the phone as this could spread the water inside further.

Avoid using heat sources (like hair dryers)

- Do not use a hair dryer or heat gun to dry the phone, as high heat can damage the internal components. Instead, allow it to air dry in a well-ventilated area.

Use silica gel packets or rice

- Place your phone in a container full of silica gel packets, which are designed to absorb moisture. If you don't have silica gel, you can use uncooked rice as a last resort. However, rice can leave dust or particles behind, so silica gel is the preferred option.

Leave it to dry for 24 to 48 hours

- Leave the phone in the drying medium for at least 24 to 48 hours. The longer you leave it, the better the chances of drying out all moisture from the device.

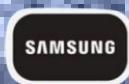

Check for water damage indicators

- Many phones have built-in water damage indicators (usually located in the SIM card tray or charging port). Check if they have turned red or pink, which could indicate water damage. If so, contact a repair service.

Seek professional help

- it's best to take it to a professional repair service. They can open the phone and dry the internal components or replace damaged parts.
