

Clean Water, Bright Futures – A CSR Initiative with Tata BlueScope Steel

Rotary Club of Kolkata Lakes, with the generous support of Tata BlueScope Steel Pvt. Ltd. through their CSR initiative, proudly undertook a meaningful project to ensure access to safe drinking water for school children in rural Bengal.

Under this initiative, water filters were installed in two Government Primary Schools — one in Bardhaman and another in Bolpur district. These schools cater to over 500 students, many of whom come from economically and socially disadvantaged backgrounds.

With the installation of these filtration systems, students now have access to clean and purified drinking water, significantly improving health standards and reducing the risk of waterborne diseases.

We are honoured to be associated with this impactful project, which not only addresses a basic necessity but also supports the broader goal of building a healthier, more equitable future for children. This collaboration stands as a testament to the power of partnership between corporate responsibility and community service.

Together, we continue to serve—building hope, one drop at a time.

From the President

Dear Fellow Rotarians,
Wishing you and your families a very Happy and Prosperous New Year 2025!

The year has begun on a high note with our enthusiastic participation in the Rotary District Conference held from 3rd to 5th January 2025. It was truly an enriching experience to connect with fellow Rotarians, share ideas, and celebrate the impact of our collective service.

Closer to home, we enjoyed a refreshing Winter Picnic, which not only strengthened our bonds as a Rotary family but also gave us moments of joy, laughter, and togetherness.

On the service front, I am proud to share that our club has continued to contribute meaningfully through projects focused on education, empowerment, and community development. Whether it's supporting the infrastructure of study centers, organizing activities for underprivileged children, or enhancing learning environments in local schools, our efforts are creating visible, lasting change.

Let us carry this momentum forward in the coming months with compassion, commitment, and collaboration. Together, we continue to uphold the Rotary spirit—Service Above Self.

On a crisp winter morning, members of the Rotary Club of Kolkata Lakes, along with their spouses, gathered at the serene and scenic locale of Karki, South 24 Parganas, for a much-awaited Winter Picnic filled with joy and camaraderie.

The Rotary District Conference 3291 was held at Nicco Park in Kolkata, West Bengal, specifically at the East Side Pavilion, on January 3rd, 4th, and 5th, 2025. This was a Rotary International District 3291 event. The conference was titled "Sammelan". It was an annual conference.
