PUBLIC APPEAL

SPONSOR A SCHOOL BENCH – LEAVE A LEGACY

You might be wondering, what does this mean?

In many schools, especially those serving children from middle-class families, the same old benches have been used for years. These benches, often overlooked, are assumed to be just fine, but they seldom provide an uplifting environment. Just as we all crave change in our lives, a new bench replacing an old one can ignite a fresh wave of enthusiasm in students' lives.

With this in mind, **Rotary Club of Surat**, under the visionary leadership of **District Governor Tusharbhaj Shah** (Surat) of **Rotary District 3060**, has launched an initiative to replace benches in various underprivileged schools across Surat.

Bench Specifications:

- **Size: 48 x 30 x 30 Inch, 25 x 25 mm MS Pipe, 18 mm MDF Top (with 2 mm PVC edge)**
- **Structure coated by Power Coating**
- **Top Size: 48" x 12", 48" x 10", 42" x 10"**

Your Name, Your Impact: The name of each donor will be proudly displayed on the bench they sponsor, leaving a lasting legacy in the lives of countless students.

These benches will be donated to underprivileged schools across Surat, making a tangible difference in the educational environment.

Cost per Bench: **Rs. 4000** /-

We eagerly await your positive response to this impactful cause.

ROTARY INFORMATION

THE ORIGIN OF ROTARY WHEEL

The first Rotary Club in Chicago began by using a cart wheel that symbolized civilization and movement.

Shortly thereafter, the words "Rotary Club" were added above it. Each new Club created chose this emblem, often supplemented by the name of its city.

In 1910, the Philadelphia Rotary Club proposed the cogwheel, illustrating the joint work to achieve a goal.

In 1912, the Association of Rotary Clubs validated this wheel, adding "Rotary International"

For several years, the number and shape of teeth varied, until the adoption of a new wheel at the Dallas Convention in 1929, which is still in use today. It includes:

1. 6 spokes
2. 24 teeth symbolizing the spirit of service at any hour of the day
3. a keying groove to lock the wheel on its axis and makes it functional
